LECTURES GONE, ROYAL'S ON

DEAN'S ADDRESS TO VISITORS

The Royal is one of the best examples of changes and developments that have taken place at Macdonald over the years. The Royal began, as you will recall, as a small version of the Toronto Royal Winter Fair, with its emphasis largely on livestock. Today the livestock show has grown, but it has become an integral part of the bigger Royal, which is in fact an "Open-House" for graduates, friends of the College and interested high school students.

The foundation that was so well laid by the graduates of earlier years has stimulated the development of the Royal to the point where today we are trying to deal with more than a thousand high school visitors — a picture different in degree, but not in kind, to that of 1948.

All of us at Macdonald feel we must preserve and build on our traditions and for this reason it is our hope that returning graduates will recognize that the things we do, the patterns of student activity, as well as Sir Williams Macdonald's

red-roofed buildings, are similar to those of their day; that the patterns established in the past are still those of today, modified by the changes desirable to serve the needs of a larger student body, the needs of a society which demands more education and training, and the needs of professions that have developed strongly and rapidly.

It is our hope that as graduates and friends of the College will not only recognize with pleasure the places and activities that you recall from earlier years, but that you will be pleased with the new versions of older traditions that you will encounter on the Campus. We feel that you can take real pride in what you see today — your influences have been strong in shaping our development.

Vice-Principal

OUR QUEEN

Today at the official opening ceremonies, D. M. Smythe, President of the Macdonald College Branch of the McGill

Louise Knowles

Graduate Society placed a glittering crown on Miss Louise Knowles head, and presented her as our 1963 College Royal Queen. Throughout the day Louise will carry the traditional sceptre, emblem of sovereignty as she makes her rounds of public appearances that will end tonight at the Award's Presentation. She will be accompanied by her princesses: Judy Evans, Penny Tomalty, Gillian Price, and Phyllis Bryans.

Louise came to us from our own Ste. Anne de Bellevue and graduated from Macdonald High School where she took part in many High school activities.

Here at Macdonald, she is completing her Junior year of the Home Economics course. She is president of her class and takes part in interclass sports.

Congratulations to our 1963 Royal Queen.

Dr. Claud Hudson Delivers Opening Address

The culmination of eight months active preparations was realized this morning at 10:00 AM, when Dr. Claud Hudson officially opened the 16th Annual College Royal.

There was approximately 700 visitors in the assembly hall, both high school students and old grads, to hear Dr. Hudson deliver his key-note address.

Dr. Hudson was made Director of the Agriculture and Fisheries Branch of the Department of Trade and Commerce. Dr. Hudson recently returned to the Department from London, England, where he had been serving as Executive Secretary of the International Wheat Council since January, 1960. Prior to taking his appointment which the Wheat Council, he had been Chief of the Grain Division and Assistant Director of the Agriculture and Fisheries Branch.

Dr. Hudson was born in Fitzroy Township, Ontario, in 1908. He obtained his B.Sc. in Agriculture from Macdonald College of McGill University and carried on postgraduate studies in Agricultural Economics at Cornell and Cambridge Universities, where he obtained his M.Sc. and Ph.D.

He joined the staff of the Economics Division of the Department of Agriculture soon after its formation in 1930, where he carried out economic research in connection with a wide range of Canadian farm problems, particularly in the area of farm management. He was Canadian Liaison Officer with the Food and Agricultural Organization from 1948 to 1955, and represented Canada at FAO.

In 1955 - 56 he served as Advisor on Agriculture Marketing to the government of Egypt under the FAO.

Dr. Hudson served with the Canadian Army from 1941 to 1945. He was made a fellow of the Agricultural Institute of Canada in 1962.

EDITORIALS COMMENTS

All of us — as graduates — have had thoughts about our Alumni Association at some time or other. Some of us only fleetingly, others considering the situation at some length. In my own travels, and in meeting with former Mac students, I find that many have lost all contact with the College, and therefore are not deeply concerned. Some even think of Macdonald as not having an Alumni Association of any sort. We are happy, of course, with our McGill Graduates Society, which does take our problems sympathetically. Many Macdonald graduates are strong supporters of the McGill Graduate Society, and as such are close to the McGill scene, contributing annually as do most other McGill Grads.

But, is the McGill Graduate Society sufficient to do a job of keeping Macdonald graduates and former students informed of the present status of the College, and be a nucleus of information on the wheres and whys of our former class mates, friends, and faculty?

To our credit, there are several classes, mainly the recent ones, which still maintain an active contact within the class itself; and these classes are usually the ones which give greatest support to any of our Alumni Association functions.

In general, however, we must concur that the Macdonald Alumni Association is far from being a dynamic thriving organization.

But what is a thriving Alumni Association? Why should we have an active Alumni group? Why take the time and effort required to keep up-to-date lists of names, jobs, families, etc. After all, we're all busy with our own personal and employment activities, and have little time for outside thoughts or endeavours. But a thriving Alumni Association usually goes along with a good College. Whether the good college or the Alumni Association comes first is like the proverbial "chicken and the egg."

It is with the above thoughts in mind that the present Alumni Association have at least considered the problem, and are attempting to overcome the present situation. This issue of the Failt-Ye Times, coming at the time of the "College Royal," is one of the first steps we are taking to draw Macdonald Alumni closer together. 2,700 copies of our issue will be printed, and a copy sent out to all graduates whose names are presently on file at the McGill Graduate Society office. For those of you who read the other articles in this issue, written by graduates of this institution, you will understand that a graduate, upon receiving his copy, will be brought up-to-date on many phases of the College.

However, one issue of the Failt-Ye Times would not change the situation, and we have many other plans for the future.

The Ontario Agricultural College, for many years, has had an aggressive Alumni Association, and indeed publishes their own monthly Alumni news. To do this, they have a full-time editor and secretarial staff. However, this costs money; and until we are in a much stronger position we cannot hope to measure up to this comparison. Nevertheless, I believe we can look to this as an example, and work towards this with as much energy as is possible.

We have a new Registrar — a graduate of Macdonald College — who is most willing to co-operate with our Alumni Association, and help keep class lists and changes where required. With this type of co-operation, and with an aggressive Alumni Association executive, we feel we can at least get the initial steps taken.

We need co-operation from many more graduates and former students. We hope that this issue of the Failt-Ye Times will be well read by the graduates, and that it will inspire some of them to offer to contribute articles, main-

LETTERS to the editor

Dear Sir:

Last week the Institute of Education dropped a load on the shoulders of the first year teachers in the form of a list of next year's options. The students' reaction varied from panic to despair. Diploma students may take no second year options, and degree students must continue with the options that they chose in five minutes on registration day.

The purpose of this letter is not to blast the existing system, but to offer constructive suggestions to help avoid the confusion in future years.

The main problem stems from the fact that most of us never spoke to anybody from the Institute about curriculum before we filled out the forms on registration day, and the options for second year for Dips. and the next three years for degree students, until it was too late. Now students are struck with courses they do not want or have taken in other schools, or must continue and major in subjects which they might prefer to change.

I suggest that the options be chosen during the first advisory group meeting and options should be explained in accordance with subsequent years and their options.

A. NOTHER

S-S MEETING MONDAY

The second Student Society meeting of this year will be held at 4:30 p.m. on Monday, February 25, 1963. This meeting will serve a dual purpose.

In order for all new amendments to the Students Council to be passed for ratification to the McGill Senate they must be voted on at a Student Society meeting where a quorum is present. If these amendments are passed at this meeting a final referendum will be held on the following Tuesday.

One of the more important amendments reads, "Article 4, Sub-Article 2, Objects; the amendment shall read, The Students council shall not interfere needlessly with Student Activities Committees, but shall be the final authority in matters of student policy to which all activities must adhere." The present students council feels that this amendment will clear up much of the misunderstanding that has arisen this year, between council and activities.

PRESIDENTS MESSAGE

It is most appropriate that both Graduates and Undergraduates can be reached through the medium of the "Failt-Ye-Times" which has become a common bond to the "Clan" Macdonald throughout the years. It is also appropriate that the bond be strengthened through greater participation in the Graduates' Society.

It is constant and continuing desire of your Board of Directors, while administering the affairs of the Branch, to promote an expanding membership, and to develop a closer interrelationship of members in the Macdonald College Branch of the McGill Graduates' Society.

Last year the Branch Executive inaugurated a very successful "Meet the Undergraduates" night at the College. The purpose of this social evening was to acquaint the members of the graduating classes with the activities of the Macdonald Branch and its close association with the McGill Graduates' Society. In addition to a short address by the President of the McGill Graduates' Society, followed by a question period, lively entertainment was supplied by a group of Red and White Revue performers. A similar evening is being planned again this year with the view of making this an annual function of welcoming future Grads into the Branch.

We hope that through this issue of the Failt-Ye we will create in each of you a touch of nostalgia for the past, to encourage members to renew closer ties with Macdonald and the Macdonald Branch, and to encourage non-members to renew affiliations with Fellow Grads.

I wish to extend the appreciation of the Branch Executive to the Editor and his Staff for their assistance and cooperation in preparing this issue.

DONALD M. SMYTHE.
President, Macdonald College Branch
Graduates' Society of McGill University.

DEBATES ON AND OFF CAMPUS

Last weekend over 48 teams from 24 universities and colleges in North America took part in the Annual McGill Winter Carnival Debating Conference. The moot was "Resolved that injustice is inseparable from a free enterprise system". Macdonald College entered for the third successive year and was represented by Messrs. Carlton Davis and Ron Charbonneau forming an affirmative team, and Messrs. Anthony Johnson and Brad Gatenby forming our negative team. Each team won three debates and lost two. The affirmative lost to the United States Merchant Marine Academy and the University of Toronto. They defeated Sir George William University, Williams College of New York, and New York University.

The negative lost to Columbia University and Union College but defeated Rochester Institute, Royal Military College, and Sir George Williams University. In nearly every case the margin of victory or loss was so narrow that they could have gone either way. The tournament was won by the United States Merchant Marine Academy who defeated St. Michael's College affirmative team in the final.

On Friday Mac's debating team of Al Crowe and Hilary Harewood will debate against a team from Sir George William's. The moot is "Resolved that man has more to fear than hope from the progress of science." The debate will be held in the Assembly Hall at 2:15 P.M. All are invited. It will be judged by the audience. Mac has the affirmative, S.C.W.U. the negative.

On the inter-class level the results are as follows:

Agr. 64 defeated Diploma Agr.

Agr. 65 defeated Intermediate Teachers (2S)

Ed. 63 defeated Ed. 64

The students have been fairly good this year, but we must appeal for more support in the coming debates. You are welcome to room M224 each Wednesday night at seven o'clock. You certainly can learn a lot and have fun. What is more, the debates to come are semi-finals, hence they should have a lot of spark.

The second aim of this meeting will be to present all candidates in the forthcoming Student Society elections. Each candidate will be given an opportunity to talk to the student body as a whole and expound on his

(or her) platform. It is hoped that each of you will come out and support the candidate of your choice.

As usual the Coffee shop will close at 4:15, and the commuter buses will wait until after the meeting.

Mac's Green and Gold departed from its traditional musical-comedy format this year and the result is a witty and satirical dig at several aspects of the contemporary Canadian and elsewhere scene. Barbs are directed at a variety of subjects including separatism, the international situation (in a skit entitled 'Oh Dear What Can The Matter Be?') and beauty contests, with passing reference to Beatniks, Russians, Greenwich Village et al.

The first part of the programme deals with the current political situation, grâce à Réal Caouette, in Quebec. We are introduced to a group of "scheming" (to use their own adjective) French-Canadian youths, complete with a year's supply of bootleg liquor and grandiose plans to provide every Quebec home with free maple syrup and rum. To fulfil their hopes and dreams for Alphonsia (Quebec's new title, derived from the same of its future leader, Alphonse) the separatists decide upon the brilliant strategy of cutting off the Canadian's hockey-stick supply, thus throwing Alphonsia into a state of depression. . . We'll allow the reader to take it from there: the results are well-worth seeing. Let us simply hint that 'No Room At The Top' is an appropriate title for this year's revue.

Dave Jeary, who plays a leading role as one of Alphonse's henchman, walks away with the acting honours in this act, but he is well-supported by Réjean Langlois as Alphonse and a chorus-line of lovelies.

The second of the skits concerns a hustler who has composed a brilliant act designed to earn him free drinks in every bar he visits. Enter, our Russian and again "no room at the top".

Bill Smith and Cathy Tyer are excellent in their respective roles as the hustler and his girl.

Dave Vickers, Bob Gourley, Bob Kerr and Ewen Crabb all perform well in the skit entitled "A Thing of Beauty Is A Joy Forever" but special kudoos must certainly go to Dave's costume designer. With the help of this appropriate attire, Dave shines as "Porky" the beauty queen; the audience, along with the beauty contest judges, cannot help but show their appreciation of his bounteous charms.

'Oh Dear What Can The Matter Be?' gives the behind-the-scenes' info on Diefenbaker's most important conference. The scene that steals the show takes place in a lavatory when Kennedy, Khrushchev and Diefenbaker come face to face on more personal grounds. Special mention for really fine performances goes to Tony Johnson, as Khrushchev' Sandy Fraser as President Kennedy and Barry McGowan as Diefenbaker.

This review would not be complete without a comment on the excellent job done on music by Lois Henderson and on sets by Judy Harris. Lois provides the show with appropriate sound effects and does things with the organ which we had never believed possible. The sets blend in well with the various acts and we feel they add tremendously to the effect of the whole revue.

All in all, the cast is to be congratulated for their efforts. In a little over a month Bob Capstick and P.J. Anderson have put together a first-class revue which merits the support of a first-class audience.

Enjoy yourselves.

C A P T U R E D G L I M P S E S

PRODUCER'S MESSAGE

P. G. Anderson

This year's Green and Gold is entitled, "No Room at the Top". A completely new format has been adopted for this year's presentation. Four self-sustaining acts are unified by a central theme. The plots trace the struggles of four heroes who's ambition outreaches their talent. In the first act, "Les Etats-Unis", Alphonse Rien, the last, we hope, of the Separatistes, unleashes a diabolical scheme. "Dead Drunk" the second act, shows the reactions of several characters in a bar. The third act, "Oh Dear What Can The Matter Be", gives the inside information on Diefenbaker's most important conference. The "A Thing of Beauty is a Joy Forever" concludes the performance. It shows how a contestant with the unlikely name of Porky wins a beauty contest.

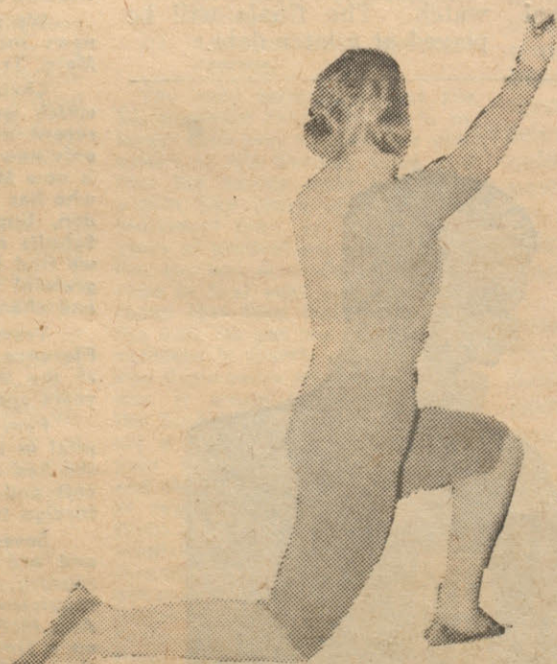

I would like, at this time, to thank all those who worked so hard. Special thanks go to Judy Harris who designed and painted the sets; to Bill Sceviour who appears tireless; to Lois Henderson who fought off the measles to give us her fine music; and to Bob Capstick, the Director, who has worked almost continuously for the past month.

Yours truly,

Peter ANDERSON,
(Producer)

Bob Capstick
Director

EDITORIALS...

(Continued from Page 2)

tain a close relationship with the Association, and in general to stimulate better liaison with all graduates.

For example, we would like to see each class name an active representative, who will be the information centre of his particular class. Possibly, we could even have a meeting of these representatives, and take further steps in planning our Association activities, subsequently.

In summation, all of you can be an important part of your Alumni Association. Drop us a line and let us know where you are, what you are doing, your occupation and family interests, etc. Furthermore, indicate whether you can help with Alumni activities by way of contributions and suggestions.

Let us all aim towards a better Macdonald Alumni Association.
J. H. HARE, P.G., '49

Hockey Marathon Program

Start: 11:00 pm. March 1st Friday.

11:00 pm. — 9:00 am. Class and organizations. — Men.

9:00 am. — 2:30 pm. Class and organizations — Women.

2:30 pm. — presentation of cheque to Montreal Crippled Children Fund. — Macdonald Girls intercollegiate hockey game.

4:00 — 5:00 — Dutchies vs Blokes.

5:00 — 7:00 — Professors.

7:00 — 11:00 — Interclass hockey — men.

11:00 — 9:00 am. — Sunday, Class and organizations Men.

9:00 — 3:00 pm. — Class and Organizations — Women.

3:00 — 8:00 — Class and Organizations — Men.

8:00 — 10:00 — East vs. West.

10:00 pm. — 8:00 am. Monday, Class and Organizations — Men.

8:00 Class and Organizations - Men and Women. (not mixed).

NO ONE IS ALLOWED TO MISS CLASSES!!!
WE NEED THE SUPPORT OF THE WHOLE COLLEGE.

BADMINTON

All games will be played Friday night after the Mac Royal. The games are fast and furious and great for spectators. Come out and watch. The finals will be played at a later date.

WHAT'S NEW AND NEWS IN HOUSEHOLD SCIENCE

by Carolyn Hollier

To some of our graduates the new labs in the School of Household Science are no longer new. This, in fact is our second year on the third floor of the Main Building.

Many of you will remember the third floor as being part of the residence accommodation for women students. In the spring of 1961 the contractors commenced to dismantle or "degut" the Main Building. This sounds rather ghastly and in fact the whole process was somewhat of a nightmare for anyone who attempted to remain in the building during the summer months. However, the tearing down of plaster and the building up of new walls was finally accomplished, and in the fall of 1961 we moved into our new quarters. It was worth all the trouble of clearing our antiques out of the storeroom, many of which had been there since 1908 or thereabouts. We are delighted with the new facilities and most of the graduates who have seen the changes find it hard to remember what the laboratories looked like when they were on the second floor. In addition to the third floor space we have some space in the renovated attic and the handicraft department, under Miss Wren, has moved from the basement to the attic and has been incorporated in the School of Household Science.

The main feature of our new laboratories is a great deal of shiny new equipment. To the uninitiated in the complexities of the original electrical system at Macdonald College, it may come as somewhat of a surprise, but most of our electrical equipment in the old days was 220 direct current. As a result it was almost impossible to replace the old equipment towards the end of our stay on the second floor, and equally difficult to have it repaired. Consequently, we were limping along with the old ovens giving out one at a time until we practically came to a standstill. Now, all our equipment is on 110 alternating current and we have been able to purchase equipment which we had looked at with longing for some time. Among the items purchased was an electronic oven which is located in the Basic Foods Lab and which has proved to be an item of great interest to students and visitors alike. We also have several items of small commercial type equipment in the Advanced Foods Lab which is being used for quantity cookery classes in the fourth year. This is an innovation of which we are very proud. We feel that there are many advantages to be gained in having this equipment available for the students to use in a laboratory setup, before they attempt to do a dietetic intern ship.

Our textile laboratory is greatly improved with a small chemical lab. adjacent to the general lab. The two sewing areas are standard, but they are bright and roomy, with plenty of cupboard space.

There is very little more that we can tell you about our facilities. Many of you have already seen the changes and we cordially invite anyone who is passing by to drop in and see for herself.

There have been relatively few Staff changes in the last few years with the exception of the retirement of Miss Alice Stickwood who had been at Macdonald for many years and is known to a large number of our graduates. Miss Stickwood is now living in Newmarket, Ont. in her family home with her brother.

Our more recent graduates will remember Mrs. Helen Young who is now living in Amherst, Mass. with her family of two girls, not to mention her husband Les. who is a graduate student at the University of Mass.

Frances (Tucker) Hicks who was a staff member for three years and one of our own graduates is now a graduate student at the University of Saskatchewan, where she and her husband, Mike enrolled in September 1962 in the Department of Nutrition.

Carolyn Hollier has joined the Staff this year and is also undertaking Graduate Studies in the Nutrition Department. Assisting her with this project is Heather McLaine Driver. Heather's husband Galvin is back at Macdonald completing his degree and they are living on the Campus with their two sons, Ian and Allen. In addition we have a student from McGill University who is working on a Masters Degree and has one foot in our School and one in the Nutrition Department. We are very interested in the two research projects which are being carried on by these Graduate Students and hope that we shall be able to tell you more about them in the future.

... We sometimes hear from previous staff members and our recent news includes an announcement of a third son, (fourth child) to Marg. Trapp, who is now Mrs. W. Mills, living in Edson, Alberta.

Christmas brought a flood of cards and greetings from graduates which were most welcome and enjoyable, many bringing news of recent marriages. Some of our graduates seem to have found not only new names but also new countries. These include Pat James who is now Mrs. Bates and is living in Nairobi, Kenya and Barbara Warr who has become Mrs. Michael Ashby and is living in Battersby, London, England. Ann Winship has changed her name to Mrs. Phil Schultz and is living in Texas. We know there are many others but we find it hard to keep up with the name changes and we are very grateful to those who have kindly sent us wedding announcements and changes of address.

Travels abroad have also claimed other graduates, notably Dr. Florence Farmer who is now living in Madras, India. Dr. Farmer is at the Women's Christian College and was home for a visit two years ago. We all look forward to her next appearance.

Pam Walsh is currently on the Staff of the Hammersmith Hospital in London England. Prior to settling down to living in London she had an exciting and interesting tour of the Continent. Joan Turcott and Marg. Baxter have also been indulging their interests in foreign travel lately and we enjoy hearing of their exploits.

Several of our graduates have decided to further their education and are enrolled as graduate students in universities across the country. Margaret Kirkcaldy is at Berkley California studying the requirements for a Master's Degree at Tufts University in Boston and Ann McFarlane is currently at the Harvard School of Public Health on a Nutrition Project. Edna McCutcheon Hamilton is interested in the possibility of Graduate work at the University of Wisconsin and we hope that her plans will work out for an Assistantship in September 1963.

There have been a number of recent additions to the Macdonald Family. Ethel Moffat Fulford and Shirley Stewart Norman both have new sons. Two items that are hot off the press, as it were, are the arrival of sons to Elizabeth Aird Hamilton in Miami, Florida, and to Yvette Reid Charette in Montreal. Going back further, Dot Robertson has a new daughter-in-law. Her eldest son, Brian, was married in Detroit just before Christmas.

If you have persevered this far in reading about the School, you will realize that things have not been standing still either at Macdonald College or with our Graduates, who have left us to make their homes in Canada or elsewhere. We are always glad to hear news of the graduates and look forward to seeing you not only on reunion weekends but anytime throughout the year.

**DOW MAKES IT BETTER...
BETTER MAKE IT DOW**

FACULTY OF AGRICULTURE

by Dr H. McRAE

The Faculty of Agriculture has experienced, during the past year, some significant changes of interest to former graduates of Macdonald College. These changes reside not only in teaching and administrative personnel and in the formation of a new Department within the Faculty but also in physical changes such as renovation and expansion of laboratory facilities to meet increasing demands for both undergraduate teaching and for research training at the graduate level.

Dr. W. A. DeLong retired last summer following 26 years of distinguished service to Macdonald College, the University and to the advancement of agricultural science. He will, of course, be remembered not only by the many undergraduate students who studied soil chemistry, analytical chemistry and plant biochemistry, but also by the more than forty graduate students in Agricultural Chemistry for whom he served as advisor and director of research.

Professor DeLong's retirement brought into sharp focus the necessity for the establishment of a separate Department of Soil Science to provide a means whereby programs of teaching and research within the Faculty of Agriculture could be drawn together under a formally recognized group. This new department would therefore encompass a wider coverage of studies in the field of soil science and would include three major areas, viz., soil physics, soil chemistry and pedology. The Department came into being last September and now offers a Soil Science undergraduate option which replaces the previous specialization in soil and plant chemistry in the Agricultural chemistry option.

Dr. B. P. Warkentin, previously with the Department of Agricultural Physics has been appointed Associate Professor and Chairman of the new Department and Dr. A. F. MacKenzie of the Department of Agricultural Chemistry as Assistant Professor of Soil Science. Dr. Warkentin joined the staff at Macdonald College in 1957 and taught mathematics and soil physics as well as conducting research in physical properties of soils. He graduated from the University of British Columbia majoring in soil science and did graduate work in soil physics and chemistry at Cornell University where he received his Ph.D. degree. There followed a year at the University of Oxford on a National Research Council Overseas Postdoctorate Fellowship where he worked on swelling of clays. Dr. Warkentin, in addition to his undergraduate teaching will continue research work on water in clay soils and on engineering properties of clays and has been studies in using tracer fertilizers to measure the availability of phosphate and potash in Quebec soils.

Dr. MacKenzie graduated with honors in Soil Science from the University of Saskatchewan where he also obtained a Master of Science degree working on the chemistry of phosphate fertilizer in soils. He received his Ph.D. degree from Cornell University in 1959 for his work on chemistry of organic soils. From 1959 to

1962 he was Assistant Professor of Soils at the Ontario Agricultural College. In 1962, he joined the staff at Macdonald College. He will be specializing in problems of soil chemistry and soil fertility.

Personnel changes have also taken place in the Department of Entomology-Plant Pathology. Professor DuPorte has completed his Post-Retirement appointment and both he and Professor DeLong were made Emeritus Professors at McGill's spring Convocation.

Dr. Bob Bigelow accepted a position at the University of Canterbury, Christ Church, New Zealand and his position has been filled by the appointment of Dr. Ed. LeRoux, who was, as many graduates will remember, a former student at Macdonald College. Dr. LeRoux served for several years with the Canada Department of Agriculture before returning to Macdonald College.

Two new staff members have recently joined the Department of Animal Science. Dr. Robert O. Hawes has joined the Department as Assistant Professor of Animal Science. His area of specialization will be in the field of poultry breeding and genetics. Dr. Hawes is a native of Maine, and he received his University education at the University of Maine, University of Massachusetts and Pennsylvania State University. Dr. Connally O. Briles has recently joined the Department as an Associate Professor of Animal Science and Genetics. His area of specialization is immunogenetics and will direct blood group research in domestic poultry. Dr. Briles is a native of Oklahoma and received his University education at Texas A. and M. College and the University of Wisconsin.

Many will probably be interested to know that Dr. Eugene Donnefer of the Department of Animal Science has been awarded a National Science Foundation Postdoctoral Fellowship for a 12-month study and research program at the Institute of Animal Nutrition of the Swiss Federal Institute of Technology in Zurich, Switzerland.

Two new administrative appointments have been made during the past year which we know will be as enthusiastically received by former graduates as they have been by members of the Macdonald College campus. Mr. Bill Shipley was recently appointed Registrar-Secretary of Macdonald College — a dual role which, you will agree, has been capably filled.

Last October, Mr. Mark Waldron returned to Macdonald College as Director of the Extension Service. Recent graduates will of course remember that Mark obtained his B.Sc. degree in 1959. Others will know him for his excellent work with the CBC where he was Regional Supervisor (Toronto) of Farm Broadcasts. His responsibilities will involve the Macdonald Farm Journal, the Quebec Farm Radio Forums as well as the film library, the evening extension courses, short courses for farmers and as a lecturer in third and fourth year Agriculture.

STUDENT AID FUND

by Dr J. Bubar

Graduates of the Macdonald College Faculty of Agriculture used to have their own Alumni Society which was quite independent of the McGill Graduate Society. Before the two organizations amalgamated, the Macdonald Graduates had accumulated a fund of approximately \$10,000 which was known as "The Macdonald College Agricultural Association Memorial Scholarship Fund." This money was invested and the interest was used to provide funds for the two "Alumni Bursaries" which are awarded each year to entering students. One of the terms of the agreement which was made when the Macdonald Graduates re-organized to become the Macdonald College Branch of the McGill Graduates Society was that the fund would remain with the Branch and the bursaries would be continued.

In 1957 and 1958, the Macdonald Branch Executive raised the question of making loans to students from the principal of the endowment. An extensive study was carried out to determine how much a loan fund could operate, what risks were involved and what limitations should be imposed. It was decided that it would be necessary to restrict this fund to Canadian citizens, and that it would be desirable to limit it to students working for one of the three Bachelor's degrees offered at Macdonald — B.Sc. (Agr.), B.Sc. (H.Ec.) or B.Ed. The only academic limitation is that the student is required to have achieved an average of 65% in the previous year of college and a limitation of \$500 per year (a total of \$2,000 in four years) was suggested for the amount that could be loaned to any one student. In making these latter two restrictions, it was agreed that the loan fund committee would be free to make due allowance for any extenuating circumstances that an applicant may plead such as illness, problems at home, etc.

What this loan fund plan amounts to is A PROMISE BY MACDONALD COLLEGE GRADUATES that they will provide financial assistance to EVERY STUDENT WHO REALLY NEEDS MONEY as long as the student is:

- A Canadian citizen;
- Working towards a Bachelor's degree at Macdonald College;
- Achieves a 65 per cent average.

The only terms are that the Society must collect its 4½% interest each year to meet the obligation to the Bursary fund, and that the money must be repaid within five years of making an individual loan, or within three years of graduation, whichever is the shorter. A student who borrows in first year would have to repay that loan five years from the date he got the loan, a loan obtained in fourth year would be due three years after convocation day. It would be acceptable to the Society for a student to pay off a loan obtained during any year out of summer earnings, and then to apply for a new loan at registration in the fall. Students are encouraged to apply for scholarship or loans with less interest. If the student fails to get such loan, the loan fund committee is prepared to honour the Society promise promptly at any time throughout the academic year.

Loans are also available to entering students on the basis of their entrance qualifications and letters of recommendation. The Society has gone to some selected High Schools in Quebec and promised all students that meet certain academic standards that they will be carried by the loan fund if they need money. The entrance qualifications required by the loan fund are now being re-examined to see if they can be made

Education Serves
The Community and the World

by PROFESSOR MURIEL TOMKINS, M.A.,

INSTITUTE OF EDUCATION

Even a recent graduate of the Institute of Education who returns to the Macdonald campus finds many surprises awaiting him. He is likely to feel overwhelmed by the sheer number of students filling the classrooms, studying in the Library, or jamming the halls between lectures. Thus, in the short span of a decade, the combined enrolment figure for students on the Macdonald and McGill campuses climbed from 312 in 1950-51 to 755 in 1960-61. It now stands at 853.

Sweeping plans had to be made to take care of the crowds of prospective teachers. For many months in 1961 the Main Building reverberated to the clatter of drills and hammers as major renovations created new classrooms and offices, a second dining hall for students, and common rooms for commuters. The Library added an extension to provide reading rooms with a total capacity of 360 persons. Laird Hall, a new residence for women, shows off a striking modern décor in contrast to the venerable charm of Stewart Hall, which has housed many generations of women teachers.

Changes have taken place, too, in the number and activities of the staff. Fifty full-time and part-time instructors now comprise the staff, compared with ten in 1950. Many staff members have made contributions to education not only within the Institute but in the community and the world. At present Professor David Munroe, Director, is serving on the Quebec Royal Commission on Education, whose members have just finished a tour of schools, universities and teacher education centers in France, England, Switzerland and Russia. In 1950 Professor Wayne Hall, Associate Director, was appointed by the Canadian Government for one year as adviser to the government of Nigeria to assist with teacher training programs. Staff members have taught summer courses in education at universities across the nation: at Dalhousie University and at the Universities of New Brunswick, Saskatchewan and British Columbia.

During this session three persons are on leave of absence from the Institute for one year to do advanced work — Professors Shirley McNicol and Miles Wisenthal at the University of London and Mr. Myer Horowitz at Stanford University, California. Next year several staff members plan to study at the University of London, Harvard University and other centers of learning.

Research projects carried out by the staff (and reported in recent issues of THE BULLETIN of the Institute) include Mr. David Smith's study of the reasons for success and failure among first-year students; Professor Eigil Pedersen's report on the attitude of grade eleven students toward teaching as an occupation; and Dr. Frances Morrison's survey of the qualifications, the academic and professional preparation, and the experience of Protestant teachers in Quebec.

Members of the staff have been active in promoting new ideas which abound in education. Professor Wisenthal and Mr. Bernard Spolsky have both experimented with programmed learning in teaching grammar to students at the Institute. Professor Reginald Edwards, too, has been closely associated with developments in this field and in educational television. He was also responsible for bringing to Macdonald Sir James Pitman, who introduced to the students his new Initial Teaching Medium for teaching children to read. Dr. Christopher Hawkins spent last summer in France visiting language laboratories and studying new methods for teaching French.

The Institute has co-operated closely with the Department of External Aid and the Canadian Universities Service Overseas in their programs to supply teachers for African, Asian and Caribbean countries. All of the appointed teachers (among them two graduates of the Institute) have taken courses or attended briefing sessions at the Institute. Also in co-operation with the Department of External Aid, the Institute last year admitted nine male Nigerian teachers eager to prepare themselves for the task of educating millions of their countrymen. This year five Nigerian students (three men and two women) are registered.

Another important activity of the Institute is its exchange program with the State University College of Education, Plattsburgh, New York. It began in April, 1961, with an exchange of staff and students for a few days during a practice teaching period. Last year four of our students lived on the Plattsburgh campus, taught in the campus school, and attended some lectures at the College; four Plattsburgh students followed a similar program at the Institute.

The activities of the Institute are, then, many and diverse. But the Institute continues to be concerned chiefly with preparing skilled, mature teachers to join the thousands of graduates who teach in the classrooms of the province. To these graduates the Institute sends a warm greeting through the pages of this special issue of "The Fail-Ye."

MAC DRAMA CLUB TRIUMPHS

One week ago tonight Macdonald College achieved what may well be its most spectacular success in intervarsity competition this year. In competition with sixteen universities and colleges from eastern Canada, the Mac Drama Club's entry in this year's Canadian Inter-Varsity Drama Festival was "The Red and Yellow Ark" by Edward Devany. The Festival took place from February 15 to 16, at the Hart House Theatre on the University of Toronto campus. "The Red and Yellow Ark" was presented Friday evening.

At the Awards Banquet the following evening, David Gardner the Festival Adjudicator, announced that our play and its cast had won or placed in all five categories in which it was eligible. Mac was runner-up for the London Free Press Trophy for the best production, which, incidently, was awarded to the Ontario Teachers College entry. Our director, Robert Gourley won the best director award, which is perhaps the most prestigious personal award — certainly very gratifying. Fr. Gardner spoke in very appreciative tones when he awarded the Best Supporting Actress Award to Marion Dawe, who played Georgi in "The Ark".

Mr. Gardner created an award which he termed the Best Visual Presentation, and presented it to Janet Durden. Gerry Taylor received an honorable mention in the Best Supporting Actor category.

Thus it may be interpreted that the play was a well received effort, and, therefore, a worthy one. A great deal of hard work and expense of time is demanded in such a production. Congratulations are in order to all those individuals connected with Macdonald's play. Mr. Gourley constantly stressed that the team angle was the necessary approach and many are of the opinion that this concentrated group effort was the keynote of the venture's success.

Macdonald has established itself on the theatrical scene. May the impression be maintained.

AN-SCIENCE

Last Saturday afternoon, some 40 or 50 students turned up at the Dairy Barns to either take part in or witness the Livestock Judging Competition held annually by the Animal Science Club. Coming out with flying colours was G. Melvin Barclay, a third year Agriculture student from Tobique River, N.B.

Melvin, showing the qualities of an excellent judge in future years, returned a total of 441 points out of a possible 500. He will be presented with the A.R. Ness Shield at Awards Night by Prof. Ar. Ness. Second place went to the "Swamps" by way of Marinus Vande Sande with a total of 433 points.

Congratulations must be extended to Marilyn MacLennan, a third year student in Home Economics who placed fourth with 425 points. Marilyn showed quite a few of the male contestants that girl could really hold her own as a judge. Three other girls also took part in the competition, and these were, Gail Robinson, also a Home Ec., and Mary Kilgour and Bonnie Skillen from Education.

Official judges invited for the competition consisted of C. Preston Hooker from Ormstown, Murray Lord from St. Genevieve, Bob Tawes from Kirkland, Douglas Ness from Howick, and Ken Allan from Lancaster, Ontario.

The club hopes that all those who were present enjoyed themselves, and would also like to take this opportunity to thank all those who led animals for the contestants to judge.

The first six positions in the competition are as follows:

- 1st. G. Melvin Barclay. Agr. III.
- 2nd. M. Vande Sande. Agr. III.
- 3rd. A. Kirk McKell. Dip. I.
- 4th. Marilyn MacLennan. H.Ec. III
- 5th. Gordon Bustard. Dip. I.
- 6th. Owen Ketcheson. Dip. I.

M.M.

COWS IN THE RINK?

Glenfennian Rink will be the scene of a unique experiment today. For the first time in the history of this fair college the animal showing contest will be held in the rink.

Russ Ward livestock director for the Royal encountered many problems and surmounted numerous difficulties before the idea became fact. Among these were the actual getting of permission to use the rink, the covering of the ice surface so as not to spoil the ice, and the actual transportation of the animals from the barns to the rink.

On Thursday an extra half inch of ice will be added and a film of water spread over the surface. While this is freezing sawdust will be spread. This will provide a firm surface for the topping. The topping will consist of approximately six inches of wood chips and wood shavings.

Animal handling may prove to be a little more challenging and exciting. The livestock will be brought from the barns to the rink in two trucks supplied by Canada Packers. A gang of eight men, four at each end, will do the actual handling.

Needless to say the animals themselves will find this experience exciting to say the least. The unloading may be more fun to watch than the actual showing, especially those Angus steers. Because of this the arena will be divided into two areas, the actual showing area and an assembly area. It is hoped that the livestock will be in the staging area at least an hour before they are due to be shown. This should give them enough time to calm down. However the showing of these animals will probably still be a little on the difficult side.

In order that the spectators may not suffer, (as those watchers of hockey are apt to) from the biting cold, the rink will be heated. Three 300,000 BTU heaters have been obtained. Two will be directed on the stands, the remainder on the staging area. It is hoped that they will supply ample warmth.

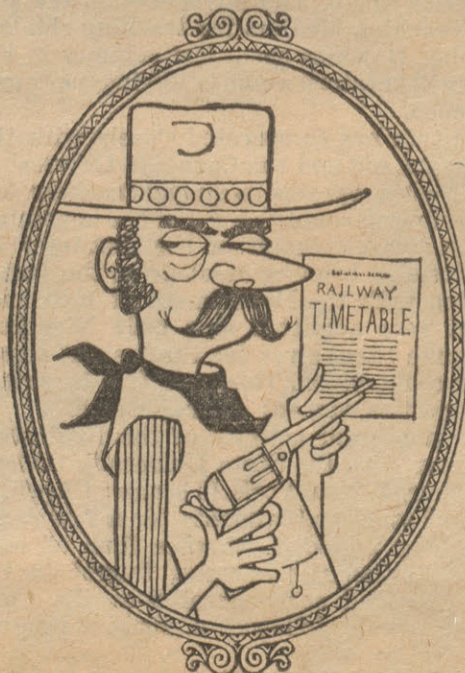

Another new innovation this year is the fact that the animals themselves will not be judged. In this way, the livestock committee hope to save time. In past years showing has gone on up to 7 p.m. This year they hope to be finished by 5 p.m.

Judges this year will be, Mr. R. Gordon Bennett, assistant Deputy Minister of Agriculture, Ontario; Mr. D. Cox, who is with the Animal Husbandry Department, Nova Scotia Department of Agriculture; Mr. W. B. McDugall, agronomist de Comté Edifice le Pionnier; and Mr. Glen Ellis, a farmer from Nova Scotia.

Whatever became of:

Jess E. James,

CLASS OF '67?

A life-long student of transportation systems, James will be best remembered for his provocative major thesis "Iron Hosses I Have Broke In." Working towards his doctorate, he formed a research team with his brother and toured the West, taking copious quantities of notes as they went. Soon the whole country was talking about the James boys and they were in great demand as guests of honour at civic parties (neckties to be worn). Despite a reputation which grew by leaps and bounds (mainly on to passing trains) Jess E. James remained an elusive, retiring person who spurned formal gatherings no matter how pressing the invitation. A superb horseman, Mr. James had a way with colts. His untimely end came when he was engaged in breaking in a new one — a 45, to be exact.

College Royal, the largest event of the College calendar is at last ready for presentation to the many visitors and friends of the College.

Since last September the Directors, under the guidance of the Executive have been planning and correlating the many displays and competitions which constitute "Macdonald in Focus."

On behalf of the Executive and Directors of the Royal, I would like to welcome all the visitors to the College and especially the High School students. I feel that their visit can be of great assistance to them in deciding their future careers.

I would like to thank Dr. Dion, Miss Neilson and Professor Hall and all the members of the staff whose guidance and co-operation have been invaluable during the preparation of the Royal.

MEN'S ATHLETICS INTERCOLLEGIATE SPORTS

HOCKEY

Last Friday night the Hockey Team played its last home game against U. of Montreal, and gave the spectators many a thrill. It was an appropriate home finisher as Mac clobbered Montreal 9 to 2.

We started off to a fast beginning with an opportune goal by Tom Clapp, who fired the puck into the open corner through a maze of players. This goal whetted our appetites as, at the end of the period we led 5-0. Pender, set up beautifully by Phillips, got the next one and after further tallies by Trivers, Murray and Pender again, we had a five point bulge over the opponents. Before the first minute of play in the second period, Trivers fired in a beautiful goal giving us 6 points. Unfortunately, a wild slap shot by a Montrealer hit a skate and deflected into the upper left hand corner of our net putting our opponents on the score sheet. In the final period we got three more: Parker, Goodwin and Murray were our marksmen while the U. of Montreal also got one to end the scoring.

All in all, the Aggies showed drive and desire and out-skated, out-shot and out-played the Montreal team. They have two more games and should take them both if they play the brand of hockey exhibited last Friday.

Intercollegiate standings:

R. M. C.	16 points	Mac	7 points
Ottawa	16 points	Carleton	7 points
U. of S.	14 points	S. G. W. U.	2 points
Loyola	10 points	Bishops	2 points

BASKETBALL

The basketball team has been playing excellently and is closing in on the first place. Last Thursday the team showed its superb skill and desire performing magnificently only to lose by one point.

In the first half, Loyola used a tricky criss-cross pattern to get one man in the clear close in. This, combined with some sharp shooting by our opponents and we found ourselves 13 points behind.

In the second half we plugged the hole in our defence but with 7 minutes to go we were still 14 points behind. The come back that the team made is so terrific that it is indescribable. In the closing seconds Ross

Armstrong scored the tying basket. The game went into overtime.

In the first overtime period we fell five points behind, but the full court press paid off as we equalled the score again. In the second overtime period the two teams jockeyed for the lead. With 30 seconds to go and the score tied a disputed foul was called against Mac. The first attempt was called back because of noise from the crowd. The ref. warned that the stands would be cleared if the disturbance persisted. The Loyola man than sank his foul shot. In the dying seconds Jim Dickie shot what he described as being "That's the one". The shot hit the rim and rolled out giving the game to Loyola. The game could have been won by a basket at any time, and despite the efforts of Art Stanley (28 pts), Dickie and Pratt we still lost. Nevertheless, this must be the most exciting game on record.

Last Tuesday, however the team had better luck. In this match they walloped Chazy 74-49 and this added fire to them for their remaining four games. We wish them all the best.

STANDINGS :

Carleton	20 points	Bishops	10 points
Loyola	16 points	Ottawa	6 points
S.G.W.U.	14 points	R.M.C.	4 points
Mac	10 points	U. of S.	0 points

STUDENT AID ...

(Continued from Page 5)

easier to meet. Schools which have been selected by the Society as an experiment to see if High School students can be encouraged to complete High School if they are promised that they will not find it financially impossible to consider college are: Ormstown, Shawville, Riverbend, Buckingham, Ste-Agathe-des-Monts, Baie Comeau and Lennexville. In addition, it is the privilege of a member of the Society to promise any High School student that he/she will be eligible for loans provided he/she meets the specified qualifications. The procedure here will be for the graduate to register the name of the individual to whom he makes such a promise with the loan fund committee.

The Macdonald College graduates who have made this loan plan possible are prepared to stand behind their promises. They recognized that the present principal in the fund, which they have built up to almost \$19,000, may be inadequate and they are prepared to raise more money if the need arises.

We hope we can relieve students on a borderline budget of financial anxiety, and encourage them to go on to finish the course and join with us to continue their associations with their college friends after they graduate. Loan applications for this fund are all handled through the Registrar's office.

WOMEN'S ATHLETICS

Intercollegiate Hockey

On Saturday, February 16, Mac travelled to Queen's University and suffered a 7 - 1 defeat at the hands of the Queen's team. Apart from the defeat, a good time was had by all.

Tuesday, February 19, sees Macdonald's Gals playing at St. Mary's Hospital at 8 P.M. at the rink.

Saturday, February 23, Mac is hosting a team from Howick at 2:30 in the afternoon. Come and cheer **your** girls to victory. We need your support.

INTERCLASS HOCKEY

Interclass hockey is well underway. The following games have already been played with the corresponding results:

FBP defeated 2P — 3 - 0
F2S defaulted to HSc 1
F2S defeated HSc 3 — 1 - 0
2BD defaulted to FBP
2P vs. HSc 3 — 1 - 1
FBP defeated F2S — 2 - 0
FBP defeated HSc 1 — 3 - 0
HSc 2 vs. F2S — 1 - 1
FBP vs. HSc 2 — 1 - 1
2BD defeated HSc 1 — 2 - 0

To date, FBP is ahead and F2S is in second place.

FENCING

The Mac Fencing team will round up this season with a Fencing Meet at John Grant High School which will be televised on March 2. Competing teams will be; Macdonald, McGill, John Grant, and possibly College Militaire Royal from St. John's, Quebec. To add to the interest, some of the fellows will be using sabers instead of the usual foil. Saber fencing requires considerable more skill, agility, and stamina due to the fact that the target is not only the region of the thorax, but also the head and arms.

The inter-club tournament will be held on March 26th at 6:30. The members of the club will be competing for the Ladie's and Men's Challenge Trophies, presented yearly by the Joint Athletic Executive. Spectators are welcome at this event.

"USE YOUR LEGS TO SAVE LEGS"

It will start Friday March 1st at 11:00 p.m. and continue until 666 ? a record is set. Lets out do the bed pushers. The Mens Athletics Ass. is arranging time for class and organization hockey teams. The entry fee is \$1.00 for male students and .50c for female students. The proceeds of the Marathon will be turned over to the Montreal Crippled Children Ass. A cheque will be presented to the crippled children on Saturday afternoon March 2nd preceding the MAC girls intercollegiate hockey game.

"Use Your Legs To Serve Legs" means that while having a lot of fun you are contributing to a worthy cause.

Ice time, period of 2 hours for boys and one hour for girls will be allotted randomly. Class teams will be organized by respective WAA and MAA representatives and organizations interested in participating contact Judy Chapman, Don Grant and Guy Jacob. The cause is there the knee is good, lets skate for the crippled children and a new record for MAC.

MAA Executive.
